PERSONAL SUMMARY

IT Executive with full-stack development experience across frontend and backend systems, using PHP, Laravel (MVC, Eloquent ORM, Blade), MySQL, and React/Inertia.js to build and maintain web systems and client websites. Skilled in database design, CMS management, system deployment, manual QA/UAT, and client technical support. Experienced in project coordination and technical documentation, with familiarity in modern development workflows and AI-assisted coding tools such as GitHub Copilot to improve development efficiency.

Core Technical Skills: PHP, Laravel, MVC Architecture, Eloquent ORM, MySQL, Server-Side Data Integration (Inertia.js), Git/GitHub, React, JavaScript

WORK EXPERIENCE

IT Executive

June 2025 – Present

Laman Teknologi Sdn. Bhd.

- Develop, maintain, and enhance backend systems and web applications using PHP and Laravel, applying MVC architecture and Eloquent ORM for data handling and business logic.
- Design and manage MySQL databases supporting company and client systems, ensuring data integrity across PMO, CMS, support, and event platforms.
- Build and maintain server-side data integration between Laravel backend services and React/Inertia.js frontend interfaces for internal and client-facing systems.
- Implement system enhancements, website updates, and frontend improvements based on client and business requirements.
- Conduct manual QA and User Acceptance Testing (UAT) sessions with clients to validate system functionality prior to deployment.
- Troubleshoot and resolve backend and frontend technical issues across web systems and client websites.
- Collaborate with clients to gather requirements and translate them into system changes and backend logic.
- Involved in the development of PMO systems, CMS platforms, support systems, event systems, and internal company systems.
- Served as Project Manager for the PMO system project, coordinating project documentation, requirements, and implementation activities.
- Prepare proposals and technical documentation for project implementation and system reporting.
- Maintain project status tracking to prioritize tasks and ensure timely delivery of system enhancements.
- Utilize modern development tools and AI-assisted coding workflows (e.g., GitHub Copilot) to enhance development efficiency and productivity.

IT Support Technician (Intern)

September 2022 – March 2023

Akademi Usahawan Mikro Sdn. Bhd.

- Assisted clients in setting up and managing websites using CMS platforms.
- Provided technical support and troubleshooting for client website issues and system usage.
- Supported website maintenance activities, including subscription monitoring and update coordination.
- Assisted clients with domain connection and website configuration processes.
- Participated as a facilitator during digital business seminars, guiding small entrepreneurs on website usage and social media promotion.

SKILLS

Programming Languages: PHP, JavaScript, HTML, CSS

Backend & Database: Laravel (MVC, Eloquent ORM, Blade), Server-Side Data Integration (Inertia.js), MySQL, Database Design, SQL

Frontend & Frameworks: React, Inertia.js, WordPress (Basic), Flutter (Basic)

Tools & Platforms: Git, GitHub, GitHub Copilot, Visual Studio Code, Figma, Canva, Microsoft Office

Practices & Support: Manual QA & UAT, Technical Documentation, Client Technical Support, Website Deployment, CMS Management, Technical Troubleshooting

PROJECTS

PMO Management System | *Laravel, React, Inertia.js, MySQL*

- Contributed to the development and enhancement of a PMO management system for project monitoring and reporting, including backend logic and database structure.
- Implemented frontend improvements, system updates, and functional enhancements based on business requirements.
- Served as Project Manager for selected implementation activities, including project documentation and coordination.

Support Management System | *Laravel, React, Inertia.js, MySQL*

- Developed and maintained a support management system for handling customer technical requests and issue tracking, including backend data models.
- Implemented system updates and troubleshooting improvements to improve workflow efficiency and usability.

Corporate Website Development | *Laravel, React, Inertia.js*

- Developed and maintained company and client websites based on business and branding requirements.
- Implemented frontend updates, responsive layouts, and website content enhancements.
- Supported website deployment and update activities for internal and client projects.

BookMe: UiTM Badminton Court Booking Mobile Application | *Flutter*

- Developed a mobile application for badminton court booking using Flutter.
- Implemented user and admin functionalities for booking management.
- Designed responsive user interfaces and integrated system functionalities to improve booking efficiency.
